

Aerotech SteelFiber Composite Iron Shafts Score Big Finish at Shriners

Just two weeks after winning the Turning Stone Resort Championship, high-performance Aerotech SteelFiber composite shafts scored an impressive Top 10 finish at the Justin Timberlake Shriners Hospitals for Children Open at TPC Summerlin in Las Vegas, Nev. SteelFiber shafts continue to grab the attention of pros on the world tours for their innovative composite engineering that combines a high-modulus graphite core with 59 miles of steel fiber lacing the shaft surface.

Playing Aerotech SteelFiber i95 taper tip constant weight shafts in his Bridgestone irons (4-PW), the Top 10 finisher and former United States Men's Amateur Golf Champion shot a 66-64-72-66 (268) for a seventh-place tie.

"With SteelFiber technology, professional players have discovered that there is another high-performance option to steel-shafted irons. Every week we hear another success story that illustrates how the lighter weights and vibration-dampening characteristics of composite shafts are giving players a combination of benefits they cannot get anywhere else," says Aerotech Golf President Chris Hilleary.

Delivering the power of graphite and the stability of steel on professional tours, SteelFiber shafts feature a high-modulus graphite core and more than 59 miles of steel fiber covering the surface of each shaft, providing golfers with the power of graphite and the stability of steel. While the shaft's graphite core provides vibration dampening, increased clubhead speed and maximum distance, the steel fibers produce an optimum weighting for a solid feel at impact and add stability and control for pinpoint accuracy. Originally developed for irons the SteelFiber technology now enhances the performance of hybrids, fairway woods and drivers.

Aerotech specializes in uniquely engineered, performance-enhancing golf shafts and has supplied shafts to such renowned golf club manufacturers as Cleveland Golf, Adams Golf, Fenwick, Srixon, Lynx, Zevo and Pure Spin among many others.

About Aerotech Golf

Located in Bellingham, Wash., Aerotech Golf designs and manufactures high-performance golf shafts, including the award-winning SteelFiber, PowerCoil, Player Spec and the all-new Claymore brands. For more information about Aerotech Golf shafts, call 888.733.8988 or visit www.aerotechgolfshafts.com
